Notice of Inventory Completion for Native American Human Remains in the Possession of the Office of the State Archeologist, University of Iowa, Iowa City, IA

AGENCY: National Park Service

ACTION: Notice

Notice is hereby given under the Native American Graves Protection and Repatriation Act, 25 U.S.C. 3003 (d), of the completion of an inventory for Native American human remains from the State of Washington currently in the possession of the Office of the State Archeologist, University of Iowa, Iowa City, IA.

A detailed inventory and assessment has been made by members of the professional staff of the Office of the State Archeologist Burials Program in consultation with representatives of the Confederated Tribes and Bands of the Yakama Indian Nation.

In 1994, the human remains were transferred to the Iowa Office of the State Archeologist Burials Program as part of a collection from the estate of Mr. John Morrie. Limited provenience information indicated the remains were found on the Columbia River near the city of Vantage, Kittias County, Washington. It is not known when or how these human remains came into the donor's possession.

The human remains represent one individual. Face morphology indicates the individual is an adult Native American woman. Mummified tissue and a small amount of hair remain attached to the cranium. No known individual was identified. No associated funerary objects are present.

Representatives of the Confederated Tribes and Bands of the Yakama Indian Nation have identified the banks of the Columbia River in Kittias county as part of their traditional occupation area from pre-contact times. The representatives

have also presented evidence that occupation areas often contain burials.

Based on the above mentioned information, officials of the Office of the State Archeologist Burials Program have determined that, pursuant to 43 CFR 10 (d)(1), the human remains listed above represent the physical remains of one individual of Native American ancestry. Burials Program officials have further determined that, pursuant to 25 U.S.C. 3001 (2), there is a relationship of shared group identity which can be reasonably traced between the human remains and the Confederated Tribes and Bands of the Yakama Indian Nation.

This notice has been sent to officials of the confederated Tribes and Bands of the Yakama Indian Nation. Representatives of any other Indian tribe which believes itself to be culturally affiliated with the human remains should contact Shirley Schermer, Burials Program Director, Office of the State Archeologist, Eastlawn, University of Iowa, Iowa City, IA 52242, telephone (319) 335-2400 before March 1, 1996. Repatriation of these human remains to the Confederated Tribes and Bands of the Yakama Indian Nation may begin after this date if no additional claimants come forward.

Dated: January 24, 1996.
 Francis P. McManamon,
 Chief Archeologist, Departmental Consulting
 Archeologist, Archeology and Ethnography
 Program.

INTERNATIONAL TRADE COMMISSION

In the Matter of certain salinomycin biomass and preparations containing same; certain neodymium-iron-boron magnets, magnet alloys, and articles containing same; certain electrical connectors and products containing same; certain microprocessors having alignment checking and products containing same; certain asian-style kamaboko fish cakes.

[Investigation Nos. 337-TA-370, 337-TA-372, 337-TA-374, 337-TA-377, 337-TA-378]

Notice of Commission Decisions To Extend Deadlines for Determining Whether To Review Two Initial Determinations and Notice That Three Initial Determinations Have Become Final

AGENCY: U.S. International Trade Commission.

ACTION: Notice.

SUMMARY: Notice is hereby given that the U.S. International Trade

Commission has decided to extend by 15 business days the administrative deadlines for determining whether to review two initial determinations (IDs) issued by the presiding administrative law judges in the above-captioned *Salinomycin* and *Magnets* investigations and to declare the *Salinomycin* investigation "more complicated." These actions are necessary because of the recent loss of 15 business days due to the partial government-wide shutdown, snow emergency days, and an agency furlough. The loss of these 15 business days is an "other significant factor" within the meaning of Commission rule 210.22(a), 59 F.R. 39049 (Aug. 1, 1994), which governs the *Salinomycin* investigation. Notice is also hereby given that three IDs issued in the above-captioned *Fish Cakes*, *Electrical Connectors*, and *Microprocessors* investigations have become final by operation of Commission rule 210.42(h)(3), 19 C.F.R. 210.42(h)(3).

FOR FURTHER INFORMATION CONTACT: Lyle Vander Schaaf, Esq., Office of the General Counsel, U.S. International Trade Commission, telephone 202-205-3107.

SUPPLEMENTARY INFORMATION: The Commission was closed 11 business days (December 18, 1995—January 7, 1996) due to the partial government-wide shutdown. Following this shutdown, the agency was closed for three days due to a snow emergency (January 8–10, 1996). The Commission opened for one day, then closed again on January 12, 1996, for a Commission furlough. As a result, the Commission was closed for a total of 15 business days during which time no work could be performed by Commissioners and staff on the IDs in the *Salinomycin* and *Magnets* investigations. In order to recoup this time, the Commission has decided to extend by 15 business days the administrative deadlines for deciding whether to review the IDs issued by the presiding ALJs in those two investigations. The following are the IDs to which the extensions apply and their new deadlines:

Investigation	ALJ order No.	Old deadline	New deadline
Inv. No. 337-TA-370.	Final order.	Jan. 19, 1996.	Feb. 9, 1996.
Inv. No. 337-TA-372.	Final order.	Jan. 26, 1996.	Feb. 16, 1996.

The Commission decided not to exercise its authority to extend retroactively the review deadlines for
